

BUSINESS PLAN & FINANCIAL MODEL SUPPORT

For self-employment and freelance residence applications in Germany

1. What we do

We help international entrepreneurs prepare business plans and financial models for residence permit applications under German immigration law.

We focus on:

- Clear structure and professional presentation
- Plausible assumptions and consistent numbers
- Documents that meet the expectations of German authorities and chambers

Important: We do not provide legal advice. Your lawyer remains in charge of the legal strategy. **We coordinate with your lawyer to ensure all documents align with your application.**

2. Service options

2.1 Expert Review

You already have a draft (self-written, consultant, or AI-generated). We review it for logic, consistency, and gaps.

Deliverable: Written assessment with concrete recommendations + optional 30-minute call.

2.2 Financial Model

We build a financial plan that holds up to scrutiny: revenue assumptions, cost structure, liquidity forecast, break-even logic.

Deliverable: Financial model (Excel + PDF summary) + consistency check with your business narrative.

2.3 Full Business Plan

We develop the complete plan: structure, text, financials, and supporting documents list. Includes up to two review rounds and coordination with your lawyer.

Deliverable: Complete business plan package (PDF), ready for submission.
